PD

Why is there no actual contact between the supposed independent contractor (Gagnon) and the homeowner/chainsaw owner/ (McGuire's)?

You cannot claim someone is an independent contractor after the fact unless there is some proof he was an independent contractor before the fact

Since when do independent contractors bring no tools of their own and only use the tools of the person who contracted them?
Assuming there is a contract

The only tool Gagnon provided was his own body as labor for the McGuire's, that's what employees bring to the job, not independent contractors

Ok I can go on and on here

I will wait to hear from you and get the transcripts

Paul
