DULBERG, PAUL (id #315684, dob: 03/19/1970)

Date: 11/22/2016

RE. Patient: Dulberg, Paul
DOB: 03/19/1970
Address: 4606 Hayden Court
McHenry, IL 60051

Patient ID: 315684

To Whom It May Concern:

I am writing at the request of my patient, Mr. Paul Dulberg, after our most recent clinic visit on 11/11/16. During that visit, we discussed at length the IME from Dr. Craig Phillips at the Illinois Bone & Joint Institute completed on 10/4/16. Dr. Phillips wrote a very detailed, elegant and comprehensive review of Mr. Dulberg's orthopedic injury that occurred on June 2011. However, I was rather surprised and shocked at the paucity of neurologic input into Mr. Dulberg's evaluation.

A Movement Disorders neurologist, like myself, practices in a highly subspecialized field that includes Tourettes syndrome, Parkinsons disease, Essential tremor, and Mr. Dulberg's condition of dystonia. I completed an additional 2-year fellowship program at Rush Medical Center in Chicago, after my 4-year neurologic resident training period, and have been practicing exclusively in this field for the past 17 years. I do not know Dr. (?Karen) Levin, from the Associates of Neurology, but I can assume this physician is a general neurologist.

Dystonia is a rare neurological disorder, and can be easily missed by any physician who does not have the specific training or experience to recognize its symptoms. Therefore I ask that this information be considered in Mr. Dulberg's case.

Sincerely,

Electronically Signed by: KATHY KUJAWA, MD
