Attachment : 2020 version_casestatalyst4 manual.pdf; ATT00002.bin;

Dear Mr Talarico,

Here is even a more recent copy of the Case CATalyst® Manual © 2020 Stenograph

Just a few page references below, for many more open the PDF and use the search function and type either PDF or Digital Signature.

Page 110 - Read Notes to PDF

Page 279 - Display Print to PDF option

Page 957 - Sign/Encrypt PDF

Page 967 - Digital Signatures

Digital signatures take the concept of traditional paper-based signing and turn it into a digital coded

message or "fingerprint." This fingerprint is unique to both the document and the signer. The digital

signature ensures that the signer is indeed the originator of the message/file. Changes made after the

document is signed are noted.

A digital signature is the result of a cryptographic operation. The technology behind digital signatures is

an industry standard known as Public Key Infrastructure (PKI), which guarantees data integrity and non-

repudiation of transactions. The digital signature cannot be copied, tampered or altered.

While digital and electronic signatures are terms often used interchangeably, they are distinctly different.

An electronic signature is a representation of a person in the form of a digitized image of his or her

handwritten signature. It is typically attached to an electronic document or transaction and can be copied.

Actually, it looks like almost any data in this program can be turned into a PDF and digital signatures when properly used are verifiable not just to the signer but to the individual document and cannot be replicated easily.

I'd suggest that Not using a certified encrypted digital signature is akin to a notary leaving their stamp out with a sign promoting anyone to use their stamp at will.

I'd also suggest that anyone who doesn't know how to turn the data in this software into a PDF has either never read the manual or is intentionally misleading us.

I added "2020 version_" to the front of the attached file name so it doesn't try to overwrite the previous version I sent.

Paul
